Pofit

The world's 1st chair which can interact with users through Smart App connected by bluetooth, and adapts ultimate bionic spine design with 20pcs support chips design for back muscle groups to redefine an Ergonomic Chair.

INTELLIGENT TECHNOLOGY

Pofit is the world-first chair with smart app which can guide users how to adjust to correct positions and develop good sitting habit through 5 functions:

LUMBAR PROTECTION SETTING

App can guide users to adjust to the best position for lumbar support through large data analysis to help maintain user's health.

HEALTHY SITTING POSTURE WARNING

App can detect any incorrect sitting posture and send a warning message to your phone. You can set the warning to alert you every 3, 5 or 10 minutes.

SEDENTARINESS WARNING

App can detect your daily activities status automatically and send a message to remind you to get up to move and relax when you sit for too long. You can set warning to alert you every 2, 3 or 4 hours.

SITTING POSTURE EVALUATION

How much time you sit correctly or wrongly every 3-8 hours? App can analyze it and send an evaluation message to your phone. This function can help users to develop a good & healthy sitting habit.

SITTING POSTURE STATISTICS

This function can review the sitting posture status weekly or monthly. It records the total sitting time, correct sitting posture time, and 2 types of incorrect sitting postures time.

Do's

- ✓ Always follow the assembly directions completely. Make sure all the pieces are placed in proper order so that the chair stays intact and together.
- ✓ Pay special attention to making sure the castors (i.e., wheels) are fully inserted into the base of the unit.
- ✓ Make sure you choose the right blend of features/adjustments which provides you the comfort which you desire for.
- ✓ After Every 12 months or so, inspect the chair to make sure all its parts/ components are tightened, to ensure stability. Also, Look for defective castors, loose securing bolts, loose arms, broken adjustable mechanism.
- ✓ Always keep the base of the chair completely on the floor.
- ✓ Many office chairs are equipped with a tension control on the mechanism to compensate for different body weights. Always ensure that the control is properly adjusted, resulting in a smooth and controlled tilt motion.
- ✓ Cleaning of the chair on a regular basis is very important, no matter what material has been used in the manufacturing of the chair. Cleaning helps to remove the accumulated dust and dirt out of the chair.
- ✓ Use a vacuum cleaner for cleaning of chair and while using it make sure that the suction of the vacuum cleaner is low. This will help to remain the chair be clean and the chances of it to get damaged will be minimal which will lead it to last longer.
- ✓ Wipe the chair with clean cloth if chairs have plastic material used in it. Cleaning the chair on a regular basis can also prevent rusting and staining.

Don'ts

- ✗ Don't lean so far back in your chair that the wheels or legs lift-up off the floor. Leaning can cause the chair to slip out from under you, cause structural damage, or can loosen important connections that can cause the chair to fall apart.
- ✗ Never put all your weight at the very front edge of the chair. If you sit too far forward, the chair can tip over.
- ✗ Don't leave electrical appliances on upholstered chair. Fire can result if they overheat. Be careful when smoking or carrying lighted material around upholstered chairs.
- ✗ Mock leather chairs or PU leather chairs cannot be wiped with a wet cloth as it can cause peeling on the surface.
- ✗ Don't take help of Chairs Armrests to stand up or sit down on a Chair.
- ✗ Don't try to push back Chair or apply unnecessary force while its mechanism is in Locking state.
- ✗ It is recommended that to clean the chair you shouldn't use any hard/harsh cleaner. Like, if you are using a leather chair you need to purchase the leather cleaner, for vinyl chair purchase the vinyl cleaner, etc. Use of harsh cleaner is strictly prohibited as it can cause the material to get damaged at great extent.
- ✗ Don't use any sharp object on Chair for cleaning/maintenance purposes without technical guidance.
